

# The future of health needs you

Did you know that findings from research studies are used by your GP, nurse or other health professional to enable them to offer you the most appropriate care?

Anyone registered with this practice could help shape the future of health care by helping with research projects that you may be invited to participate in.

You may be approached by a member of this practice to participate in a research project. Please consider any patient information leaflets you may receive about the research carefully. This information may be sent to you or given to you by your nurse or doctor or other health professional.

Taking part in a research project can vary greatly and might involve completing a questionnaire, agreeing to an interview with a researcher or taking part in a clinical trial.

Participation in any research is voluntary.  
You may refuse to take part in research without it affecting your usual medical care.

This Practice is part of a network of General Practices in Cambridgeshire & Peterborough who host medical research on a regular basis.
